DVD Player

**DVD-S42EE / DVD-S42GC / DVD-S42GCA / DVD-S42GCS /  
DVD-S42GCU / DVD-S42PL / DVD-S42PLA**

**DL4.1 Mechanism Series**

**Color**

**(S).....Silver Type**

## SPECIFICATIONS

### Specifications

Power supply:	AC230 V, 50 Hz (DVD-S42EE)
	AC110-240 V, 50/60 Hz (DVD-S42GC/GCA/GCU/GCS/ PL)
	AC120 V, 60 Hz (DVD-S42PLA)
Power consumption:	11 W
Power consumption in standby mode:	1 W (approx.)
Dimensions:	430 (W) x 251 (D) x 43 (H) mm
Mass:	2.2 kg (approx.)
Signal system:	PAL 625/50, PAL 525/60, NTSC (DVD-S42EE/GC/GCA/GCS/ GCU) NTSC (DVD-S42PLA/PL)
Operating temperature range:	+ 5 to + 35 °C
Operating humidity range:	5 to 90 % RH (no condensation)
Discs played [8 cm (3") or 12 cm (5")]:	
(1)	DVD (DVD-Video, DivX*6,7)
(2)	DVD-RAM (DVD-VR, JPEG*4,7, MPEG4*5,7, DivX*6,7, MP3*2,7)
(3)	DVD-R (DVD-Video, DVD-VR, JPEG*4,7, MP3*2,7, DivX* 6,7, MPEG4*5,7)
(4)	DVD-R DL (DVD-Video, DVD-VR)

- (5) DVD-RW (DVD-Video, DVD-VR, JPEG\*4,7, MP3\*2,7, DivX\*6,7, MPEG4\*5,7)
- (6) +R/+RW (Video)
- (7) +R DL (Video)
- (8) CD, CD-R / CD-RW (CD-DA, Video CD, SVCD\*1, MP3\*2,7, WMA\*3,7, JPEG\*4,7, MPEG4\*5,7, DivX\*6,7, HighMAT Level 2 (Audio and Image))

\*1 Conforming to IEC62107

\*2 MPEG-1 Layer 3, MPEG-2 Layer 3

\*3 Windows Media Audio Ver.9.0 L3  
Not compatible with Multiple Bit Rate (MBR)

\*4 Exif Ver2.1 JPEG Baseline files  
Picture resolution: between 160 x 120 and 6144 x 4096 pixels (Sub sampling is 4:0:0, 4:2:2, 4:2:0, 4:4:4)  
Extremely long and slender pictures may not be displayed.

\*5 MPEG4 data recorded with the Panasonic SD multi cameras or DVD video recorders conforming to SD VIDEO specifications (ASF standard) /MPEG4 (Simple Profile) video system/G.726 audio system

\*6 Plays all versions of DivX® video (including DivX® 6) with standard playback of DivX® media files. Certified to the DivX® Home Theater Profile.  
GMC (Global Motion Compensation) not supported.

\*7 The total combined maximum number of recognizable audio, picture and video contents and groups: 4000 audio, picture and video contents and 400 groups.

**Video output:**

Output level:	1 Vp-p (75 Ω)
Output terminal:	Pin jack (1 system)/AV (DVD-S42EE)
	Pin jack (1 system) (DVD-S42GC/GCA/GCS/GCU/ PLA/PL)

**S video output:**

Y output level:	1 Vp-p (75 Ω)
C output level:	NTSC: 0.286 Vp-p (75 Ω) PAL: 0.300 Vp-p (75 Ω)
	(DVD-S42EE/GC/GCA/GCS/ GCU)
	NTSC: 0.286 Vp-p (75 Ω) (DVD-S42PL/PLA)

**Output terminal:**

AV
(DVD-S42EE)
S terminal (1 system)
(DVD-S42GC/GCA/GCS/GCU/ PLA/PL)

**Component video output:**

[NTSC: (480)p/(480)i,

<b>PAL: (576)p/(576)i] (DVD-S42EE/GC/GCA/GCS/GCU)</b>	
<b>[NTSC: (480)p/(480)i] (DVD-S42PL/PLA)</b>	
Y output level:	1 Vp-p (75 Ω)
P B output level:	0.7 Vp-p (75 Ω)
P R output level:	0.7 Vp-p (75 Ω)
Output terminal:	Pin jack (Y: green, P B : blue, P R : red)
Number of terminals:	1 system
RGB video output:	(DVD-S42EE)
R output level:	0.7 Vp-p (75 Ω)
G output level:	0.7 Vp-p (75 Ω)
B output level:	0.7 Vp-p (75 Ω)
Output terminal:	AV
Video performance:	
Horizontal resolution:	More than 500 lines
Video S/N ratio:	More than 65dB
Audio output:	
Output level:	2 Vrms (1 kHz, 0 dB)
Output terminal:	Pin jack/AV (DVD-S42EE) Pin jack (DVD-S42GC/GCA/GCS/GCU/ PL/PLA)
Number of terminals:	
2 channel:	1 system
Audio performance:	
(1) Frequency response:	
● DVD (linear audio):	4 Hz-22 kHz (48 kHz sampling) 4 Hz-44 kHz (96 kHz sampling)
● CD audio:	4 Hz-20 kHz
(2) S / N ratio:	
● CD audio:	115 dB
(3) Dynamic range:	
● DVD (linear audio):	102 dB
● CD audio:	98 dB
(4) Total harmonic distortion:	
● CD audio:	0.003 %
Digital audio output:	
Coaxial digital output:	Pin jack
Pickup	
Wave length:	662 nm / 785 nm
Laser power:	CLASS 2 / CLASS 3A

**Note:**

Specifications are subject to change without notice.  
Mass and dimensions are approximate.

**Solder:**

**This model uses lead free solder (PbF).**

**© 2006 Matsushita Electric Industrial CO., Ltd. All rights reserved.  
Unauthorized copying and distribution is a violation of law.**

**⚠ WARNING**

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

**Panasonic®**

## **1. IMPORTANT SERVICE INFORMATION**

### **1.1. Notes**

**When you replace EEPROM or exchange MODULE P.C.B., you have to take "Manual for customer" to the customer with unit.**

**(also in the case of unit exchange)**

**Please take and use "Manual for customer" from below.**

**1. Come with MODULE P.C.B. or EEPROM (Service part).**

**2. Make a photocopy section 1.3. "Manual for customer" on this service manual.**

**"Manual for customer" has important information for "DivX Video-on-Demand Service" user.**

**Please don't forget take it to the customer with unit!**

## **1.2. About DivX**

### **1.2.1. DivX**

**A video compression format developed by DivXNetworks, Inc. that compresses video files without any considerable loss of video quality.**

### **1.2.2. About DivX Video-on-Demand Content**

DivX Video-on-Demand (VOD) content is encrypted for copyright protection. In order to play DivX VOD content on this unit, you first need to register the unit.

Follow the on line instructions for purchasing DivX VOD content to enter the unit's registration code and register the unit. For more information about DivX VOD, visit [www.divx.com/vod](http://www.divx.com/vod).

## Display the unit's registration code

- We recommend that you make a note of this code for future reference.
- After playing DivX VOD content for the first time, another registration code is then displayed in "DivX Registration". Do not use this registration code to purchase DivX VOD content. If you use this code to purchase DivX VOD content, and then play the content on this unit, you will no longer be able to play any content that you purchased using the previous code.
- If you purchase DivX VOD content using a registration code different from this unit's code, you will not be able to play this content. ("Authorization Error" is displayed.)

## Regarding DivX content that can only be played a set number of times

Some DivX VOD content can only be played a set number of times. When you play this content, the remaining number of plays is displayed. You cannot play this content when the number of remaining plays is zero. ("Rented Movie Expired" or "Rental Expired" is displayed.)

When playing this content

- The number of remaining plays is reduced by one if
  - you press [UP] or [SETUP].
  - you press [■] (STOP). [Press [■■] (PAUSE) to stop play.]

- you press [ $\leftarrow\rightleftharpoons\rightarrow$ ] (SKIP) or [ $\leftarrow\rightleftharpoons\rightarrow$ ] (SEARCH) etc. and arrive at another content or the start of the content being played.
- Resume (Stop) and Marker (Play Menu) functions do not work.

### 1.3. Manual for Customer

## 2. SAFETY PRECAUTIONS

### 2.1. GENERAL GUIDELINES

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, make the following leakage current checks to prevent the customer from being exposed to shock hazards.

#### 2.1.1. LEAKAGE CURRENT COLD CHECK

1. Unplug the AC cord and connect a jumper between the two prongs on the plug.
2. Measure the resistance value, with an ohmmeter, between the jumpered AC plug and each exposed metallic cabinet part on the equipment such as screwheads, connectors, control shafts, etc. When the exposed metallic part has a return path to the chassis, the reading should be between  $1M\ \Omega$  and  $5.2M\ \Omega$ . / When the exposed metal does not have a return path to the chassis, the reading must be  $\infty$ .

Figure 1

#### 2.1.2. LEAKAGE CURRENT HOT CHECK (See [Figure 1](#) .)

1. Plug the AC cord directly into the AC outlet. Do not use an isolation transformer for this check.
2. Connect a  $1.5k\ \Omega$ , 10 watts resistor, in parallel with a  $0.15\ \mu F$  capacitors, between each exposed metallic part on the set and a good earth ground such as a water pipe, as shown in [Figure 1](#).
3. Use an AC voltmeter, with 1000 ohms/volt or more sensitivity, to measure the potential across the resistor.
4. Check each exposed metallic part, and measure the voltage at each point.
5. Reverse the AC plug in the AC outlet and repeat each of the above measurements.
6. The potential at any point should not exceed 0.75 volts RMS. A leakage current tester (Simpson Model 229 or equivalent) may be used to make the hot checks, leakage current must not exceed 1/2 milliamp. In case a measurement is outside of the limits specified, there is a possibility of a shock hazard, and the equipment should be repaired and rechecked before it is returned to the customer.

### **3. PREVENTION OF ELECTRO STATIC DISCHARGE (ESD) TO ELECTROSTATICALLY SENSITIVE (ES) DEVICES**

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electro static discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equipped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equipped with ES devices, place the assembly on a conductive surface such as aluminum foil, to prevent electrostatic charge buildup or exposure of the

assembly.

3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder removal device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminum foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

**Caution**  
Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

## 4. PRECAUTION OF LASER DIODE

**CAUTION:**

This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pickup lens.

Wave length: 662 nm/785 nm

Maximum output radiation power from pickup: 100  $\mu$  W/VDE

Laser radiation from the pickup lens is safety level, but be sure the followings:

1. Do not disassemble the optical pickup unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pickup unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pickup lens for a long time.

## 5. SERVICE CAUTION BASED ON LEGAL RESTRICTIONS

### 5.1. General description about Lead Free Solder (PbF)

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30°C (86°F) more than that of the normal solder.

#### Definition of PCB Lead Free Solder being used

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder. (See right figure)	PbF
--	-----

#### Service caution for repair work using Lead Free Solder (PbF)

**- The lead free solder has to be used when repairing the equipment**

for which the lead free solder is used. (Definition: The letter of “PbF” is printed on the PCB using the lead free solder.)

- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at  $350\pm30^{\circ}\text{C}$  ( $662\pm86^{\circ}\text{F}$ ).

Recommended Lead Free Solder (Service Parts Route.)

The following 3 types of lead free solder are available through the service parts route.

- RFKZ03D01K----- (0.3mm 100g Reel)
- RFKZ06D01K----- (0.6mm 100g Reel)
- RFKZ10D01K----- (1.0mm 100g Reel)

#### **Note**

\* Ingredient: tin (Sn) 96.5%, silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

## **6. PREVENTION OF STATIC ELECTRICITY DISCHARGE**

The laser diode in the traverse unit (optical pickup) may brake down due to static electricity of clothes or human body. Use due caution to electrostatic breakdown when servicing and handling the laser diode.

### **6.1. Grounding for electrostatic breakdown prevention**

Some devices such as the DVD player use the optical pickup (laser diode) and the optical pickup will be damaged by static electricity in the working environment. Proceed servicing works under the working environment where grounding works is completed.

#### **6.1.1. Worktable grounding**

1. Put a conductive material (sheet) or iron sheet on the area where the optical pickup is placed, and ground the sheet.

#### **6.1.2. Human body grounding**

1. Use the anti-static wrist strap to discharge the static electricity

form your body.

#### 6.1.3. Handling of optical pickup

1. To keep the good quality of the optical pickup maintenance parts during transportation and before installation, the both ends of the laser diode are short-circuited. After replacing the parts with new ones, remove the short circuit according to the correct procedure. (See this Technical Guide.)
2. Do not use a tester to check the laser diode for the optical pickup. Failure to do so will damage the laser diode due to the power supply in the tester.

#### 6.2. Handling Precautions for Traverse Unit (Optical Pickup)

1. Do not give a considerable shock to the traverse unit (optical pickup) as it has an extremely high-precise structure.
2. When replacing the optical pickup, install the flexible cable and cut its short land with a nipper. See the optical pickup replacement procedure in this Technical Guide. Before replacing the traverse unit, remove the short pin for preventing static electricity and install a new unit. Connect the connector as short times as possible.
3. The flexible cable may be cut off if an excessive force is applied to it. Use caution when handling the cable.
4. The half-fixed resistor for laser power adjustment cannot be adjusted. Do not turn the resistor.

## 7. DISASSEMBLING THE CASING AND CHECKING P.C.B.S

### 7.1. Disassembly Procedure

## 7.2. Casing Parts and P.C.B. Positions

### 7.3. Top Panel

#### 1. Unscrew the screws.

## 7.4. Front Panel

### 1. Release the tabs and connector.

### 2. Release the tabs.

## 7.5. Operation P.C.B. and Power SW P.C.B.

### 1. Unscrew the screws.

## 7.6. Module P.C.B.

1. Remove the connectors.
2. Unscrew the screws.
3. Press each tab with the nipper to module PCB vertically.

## 7.7. Mechanism Unit

1. Unscrew the screws.

2. Release the tabs.

## 7.8. Rear panel

**1. Unscrew the screws.**

**2. Release the tabs.**

## 7.9. Mother P.C.B.

**1. Unscrew the screws.**

## 7.10. Service Position

### 7.10.1. Servicing position of the Module P.C.B.

### 7.10.2. Servicing position of the Mother P.C.B.

#### 7.10.3. List of the Extension Cables

(1)	VUC8026	14pins	PS8101(Module P.C.B.)—FP3501(Mother P.C.B.)
(2)	RFKZ0106	20pins	PS8301(Module P.C.B.)—FP3502(Mother P.C.B.)

## 8. ASSEMBLING AND DISASSEMBLING THE MECHANISM UNIT

### 8.1. Disassembly Procedure

## **8.2. Traverse Unit**

- 1. Slide the lever (A) in the arrow direction (to the opposite side) till it stops.**
- 2. Slide the lever (A) further by bending the tab at the right side of the lever A in the right direction. (The right groove opens and the boss becomes seen.)**
- 3. Open the lever (B) to left. (The 2 grooves at the left side open.)**

#### 4. Remove the traverse unit

#### 8.3. Tray

**1. Slide the guide tray unit while pressing the stopper in the arrow direction, and remove the guide tray unit.**

**2. Raise the loading unit.**

**3. Slide the lever in the arrow direction till it stops and pull the tray out.**

**4. Spread the tabs at the both sides and pull the tray out. (The tray slides a little forward and stops.)**

## 5. Remove the drive arm concave phase from the tray slider and tray.

<Assembling the tray unit>

1. Insert a part of the tray into the unit sliding over the groove on the mechanical chassis unit.
2. Insert the tray to the point before the tab of the mechanical chassis unit.

3. Hook the drive arm concave phase over the tray and the tray slider.
4. Press in the tray.
5. Make sure that the tray and the drive arm move smoothly.

## 8.4. Loading section

### 1. Spread the tabs at the both sides and push out the drive arm shaft.

### 2. Hook the lock lever spring on the lock lever projection part temporarily.

### 3. Unlock the tab and remove the lock lever.

**4. Remove the belt.**

**5. Unlock the tab and remove the pulley.**

**6. Remove the relay gear.**

**7. Turn the change lever in the arrow direction till it stops.**

**8. Hook the change lever spring on the change lever project part temporarily.**

**9. Pull the lever (B) in the bottom side to your side and remove the change lever.**

**10. Remove the drive rack, the sub rack and the drive gear.**

### 8.5. Loading motor P.C.B.

## 1. Unscrew the screws.

## 8.6. Optical Pickup Unit

### 8.6.1. Cautions to Be Taken in Handling the Optical Pickup Unit

The laser diode in the optical pickup unit may be damaged due to electrostatic discharge generating from clothes or human body. Use due caution to electrostatic discharge damage when servicing the laser diode.

1. Do not give a considerable shock to the optical pickup unit as it has an extremely high-precise structure.
2. To prevent the laser diode from the electrostatic discharge damage, the Intermediate FFC of the optical pickup unit removed from the PCB should be short-circuited with a short pin or a clip.
3. The Intermediate FFC may be cut off if an excessive force is applied to it. Use caution when handling the Intermediate FFC.
4. The antistatic FPC is connected to the new optical pickup unit. After replacing the optical pickup unit and connecting the Intermediate FFC, cut off the antistatic FPC.

### 8.6.2. Procedure for Disassembling the Optical Pickup Unit

#### 1. Move the optical pickup unit in the arrow direction till it stops.

#### 2. Unscrew the screws.

**3. Remove the drive rack.**

**4. Unscrew the screw.**

**5. Slide the shaft in the arrow direction.**

**6. Lift the optical pickup unit with the shaft.**

## 7. Remove the optical pickup unit.

[Caution]

1. Do not give a considerable shock to the optical pickup unit as it has an extremely high-precise structure.
2. Do not touch the lens in the optical pickup unit.

## 8. Pull the shaft and the rubber out.

### <Assembling the optical pickup unit>

1. Pass the intermediate FPC through the frame hole.
2. Align the guide section of the optical pickup unit with the rail.
3. Install the shaft top to the holder.

4. The intermediate FFC is fixed as shown below.

## 8.7. Traverse Motor

1. Unscrew the screws.

**2. Remove the cover while lifting the inner gear.**

**3. Remove the solders.**

**4. Remove the traverse motor.**

## 9. SELF-DIAGNOSIS FUNCTION AND SERVICE MODES

### 9.1. Optical Pickup Breakdown Diagnosis

The optical pickup self-diagnosis function and tilt adjustment check function have been included in this unit. When repairing, use the following procedure for effective Self-diagnosis and tilt adjustment. Be sure to use the self-diagnosis function before replacing the optical pickup when "NO DISC" is displayed. As a guideline, you should replace the optical pickup when the value of the laser drive current is more than 55.

**Note:**

Press the power button to turn on the power, and check the value within three minutes before the unit warms up. (Otherwise, the result will be incorrect.)

## 9.2. Service Mode Table 1

The service modes can be activated by pressing various button combination on the player and remote control unit.

Player buttons	Remote control unit buttons	Application	
PAUSE + OPEN/CLOSE	0	Displaying the UHF display F_ _ _	Refer to 9.3. Self- Diagnos- Function Display)
	5	Jitter check, tilt adjustment *Display shows J_xxx/yyy_zz "yyy" and "zz" shown to the right have nothing to do with the jitter value. "yyy" is the error counter, while "zz" is the focus drive value. Refer to section 11.4. for Optical Pickup Tilt Adjustment Procedure.	Refer to 11.4. Op- Pickup T- Adjustm
	6	Checking the region numbers and broadcast system	
	7	Checking the program version	Check the FLASH I program
	9	Lighting Confirmation Function of Display Tube	
	FUNCTION	Checking the laser drive current	Refer to Optical I Replace Procedu
	PAUSE	Writing the laser drive current value after replacing the optical pickup (do not use for anything other than optical pickup replacement)	
PAUSE QUICK OSD OPEN/CLOSE		Initializing the DVD player (restoring factory preset settings)	Refer to 9.5. Initi- DVD pla

### 9.3. DVD Self Diagnostic Function-Error Code

Error Code	Error Content	Additional error explanation	Defect 1	Defect 2
	<b>U, H error</b>			
<b>U11</b>	<b>Focus error</b>			
<b>U15</b>	<b>Unfinalized DVD-R</b>

F8A0	Message command is not appropriate	Begin sending message to AV task		

**Note:**

**An error code will be canceled if a power supply is turned OFF.**

**\*1: CPPM is the copy guard function beforehand written in the disk for protection of copyrights.**

#### 9.4. Last Error Code saved during NO PLAY

Error code	Error Content	System computer	Setting task	System computer i error code
F0BF	6) Cannot playback because physical layer is not recognizable	PCND_NOPLAY PHYSICAL 0x50	DriveManager	0xDOBF
F0C0	8) DVD: Cannot playback because it is not DVD Video/Adio/VR	PCND_NOPLAY VIDEO 0x70	DiscManager	0xDOC0
F0C1	9) DVD: Prohibited by the restricted region code	PCND_NOPLAY RCD 0x80	DiscManager	0xDOC1
F0C2	A) DVD: PAL restricted playback	PCND_NOPLAY PAL 0x90	DiscManager	0xDOC2
F0C3	B) DVD: Parental lock setting prohibits the playback of the entire title	PCND_NOPLAY PTL 0xA0	DiscManager	0xDOC3
F0C4	C) VCD: Prohibited because it is in PHOTO CD format	PCND_NOPLAY PHOTO CD 0xB0	DiscManager	0xDOC4
F0C5	VCD/CD: Prohibited because it is CDROM without CD-DA	PCND_NOPLAY CDROM 0xC0	DiscManager	0xDOC5

## 9.5. Service mode table 2

Pressing various button combinations on the player and remote control unit can activate the service modes.

Item	Player mode and button combination	Function	Display	Cancellation method
Jitter check	In STOP mode within disc, press PAUSE and OPEN/CLOSE buttons on the player, and "5" button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	Jitter check Jitter rate is measured and displayed. Measurement is repeatedly done in the cycle of one second. Read error counter starts from zero upon mode setting. When target block data failed to be read out, the counter advances by one increment. When the failure is caused by minor error, it may be corrected when retried to enable successful reading. In this case, the counter advances by one. When the error persists even after retry, the counter may jump by two or more.	J _xxx/yyy_zz(display1/display2) ↑ ↑ ↑ Focus drive value Read error counter Jitter rate Jitter check mode	Press STOP or OPEN/CLOSE button.
Error code check	In STOP (no disc) mode, press PAUSE and OPEN/CLOSE buttons on the player, and "0" button on the remote control unit. * With pointing of cursor up and down on display, the panel controller switches serial number of history and sends out the command accordingly.	Error code check The latest error code stored in EEPROM is displayed.	Error code (play_err) is expressed in the following convention. Error code = 0 x DAXX is expressed: → nn UX <sub>X</sub> Error code = 0 x DBXX is expressed: → nn HXX Error code = 0 x DXXX is expressed: → nn FXX <sub>X</sub> Error code = 0 x C000 is expressed: → nn F... * "nn" denotes the serial number of history.(01~20) * "xx" denotes the error code.	Cancelled automatically 5 seconds later.
Initial setting of laser drive current	In STOP (no disc) mode, press PAUSE and OPEN/CLOSE buttons on the player, and PAUSE button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	Initial setting of laser drive current Initial current value for each of DVD laser and CD laser is separately saved in EEPROM.	LdO/034_028(display1/display2) ↑ ↑ ↑ DVD laser current measurement CD laser current measurement Laser current measurement mode	Cancelled automatically 5 seconds later.
DVD laser drive current measurement	In STOP (no disc) mode, press PAUSE and OPEN/CLOSE buttons on the player, and FUNCTION button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	DVD laser drive current measurement DVD laser drive current is measured and the result is displayed together with the initial value stored in EEPROM. After the measurement, DVD laser emission is kept on. It is turned off when POWER key is switched off. (It is also turned off when POWER button on the player is switched off.)	Ldd/034_032(display1/display2) ↑ ↑ ↑ Measured current Initial current stored in EEPROM DVD laser current measurement mode The value denotes the current in decimal notation. The above example shows the initial current is 34mA and the measured value is 32mA.	Cancelled automatically 5 seconds later.
ADSC internal RAM data check	In STOP (no disc) mode, press PAUSE and OPEN/CLOSE buttons on the player, and RETURN button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	ADSC internal RAM data check ADSC internal RAM data is read out and displayed. Change the address with CLEAR key operation to show the data for 11 addresses.	A_FbO/A_0000(display1/display2) ↑ ↑ ↑ RAM data for specified address Address ADSC internal RAM data check mode The value is shown in hexadecimal notation. The above example shows the data in ADSC address DFAh is 6901h.	Press STOP or OPEN/CLOSE button.
Servo process display	In STOP (no disc) mode, press PAUSE and PLAY buttons on the player, and "7" button on the remote control unit.	Servo process display The servo process from STOP to ACCESS is displayed.	—	Pull out the AC cord.
CD laser drive current measurement	In STOP (no disc) mode, press PAUSE and PLAY buttons on the player, and FUNCTION button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	CD laser drive current measurement CD laser drive current is measured and the result is displayed together with the initial value stored in EEPROM. After the measurement, CD laser emission is kept on. It is turned off when POWER key is switched off. (It is also turned off when POWER button on the player is switched off.)	LdC/028_026(display1/display2) ↑ ↑ ↑ Measured current Initial current stored in EEPROM CD laser current measurement mode The value denotes the current in decimal notation. The above example shows the initial current is 28mA and the measured value is 26mA.	Cancelled automatically 5 seconds later.

Item	Player mode and button combination	Function	Display	Cancellation method
Version display	In STOP (no disc) mode, press PAUSE and OPEN/CLOSE buttons on the player, and "7" button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	Version display	 ※ When check this item, connect this player to monitor TV and check with watching the display shown on the monitor.	Cancelled automatically 5 seconds later.
Lighting of display tube	In STOP (no disc) mode, press PAUSE and OPEN/CLOSE buttons on the player, and "9" button on the remote control unit.	Lighting of display tube	_____	Repeat the same operation.
Dealer's lock	In STOP mode, press STOP button on the player, and POWER button on the remote control unit for 1 second or longer.	Dealer's lock The lock is switched ON or OFF. When dealer's lock is ON, it prohibits switching off of the secondary power and tray opening. When the lock is switched, its ON/OFF status is stored in EEPROM.	· "LOC" sign appears when dealer's lock is switched on, or when secondary power key or tray opening key is pressed while the lock is on. · "UNLOC" sign appears when dealer's lock is switched off.	Repeat the same operation.
Initialization	In STOP (no disc) mode, press PAUSE, QUICK OSD and OPEN/CLOSE buttons on the player for 3 seconds or longer.	Initialization User settings are cancelled and player is initialized to factory setting.	"In!"	
Region display	In STOP (no disc) mode, press PAUSE and OPEN/CLOSE buttons on the player, and "6" button on the remote control unit.	Region display		Cancelled automatically 5 seconds later.

Item	Player mode and button combination	Function	Display	Cancellation method
Timer 1 check	In STOP (no disc) mode, press PAUSE and PLAY buttons on the player, and "5" button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	Timer 1 check Laser operation timer Operation time is measured separately for DVD laser and CD laser.	t11234/5678(display1/display2) Shown to the display1 is DVD laser time, and to the display2 CD laser time. Time is shown in 4 digits of decimal notation in a unit of 10 hours. "0000" will follow "9999".	Cancelled automatically 5 seconds later.
Timer 1 reset	While displaying Timer 1 data, press STOP and PLAY buttons on the player, and "5" button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	Timer 1 reset Laser operation timer Operation time of both DVD laser and CD laser is reset all at once.	t10000/0000(display1/display2)	Cancelled automatically 5 seconds later.
Timer 2 check	In STOP (no disc) mode, press PAUSE and PLAY buttons on the player, and "6" button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	Timer 2 check Spindle motor operation timer	t21234/5(display1/display2) Time is shown in 5 digits of decimal notation in a unit of 10 hours. "00000" will follow "99999".	Cancelled automatically 5 seconds later.
Timer 2 reset	While displaying Timer 2 data, press STOP and PLAY buttons on the player and "6" button on the remote control unit. (Press "FL SELECT" key on the remote control unit to change the FL display for Display1 or Display2.)	Timer 2 reset Spindle motor operation timer	t20000/0(display1/display2)	Cancelled automatically 5 seconds later.

## 9.6. Sales demonstration lock function

This function prevents discs from being lost when the unit is used for sales demonstrations by disabling the disc eject function. "LOC" is displayed on the unit, and ordinary operation is disabled.

### 9.6.1. Setting

The sales demonstration lock is set by simultaneously pressing STOP button on the player and POWER button on the remote control unit for 1 second or longer.

### **9.6.2. Cancellation**

The lock can be cancelled by the same procedure as used in setting. ("UNLOC" is displayed on cancellation. Disconnecting the power cable from power outlet does not cancel the lock.)

## **9.7. Handling After Completing Repairs**

Use the following procedure after completing repairs.

### **9.7.1. Method**

Confirm that the power is turned on:

- 1. Press the "OPEN/CLOSE" button to close the tray.**
- 2. Press the "POWER" button to turn off the power.**
- 3. Disconnect the power plug from the outlet.**

### **9.7.2. Precautions**

Do not disconnect the power plug from the outlet with the tray still open, then close the tray manually.

## **10. SERVICE PRECAUTIONS**

### **10.1. Recovery after the dvd player is repaired**

- When FROM or module P.C.B. is replaced, carry out the recovery processing to optimize the drive.**  
Playback the recovery disk to process the recovery automatically.
- Recovery disc [Product number: RFKZD03R005] (RFKZD03R004 can not be recovered as a partial item.**  
So use the new recovery disc, RFKZD03R005.)
- Performing recovery**
  - 1. Load the recovery disc RFKZD03R005 on to the player and run it.**
  - 2. Recovery is performed automatically. When it is finished, a message appears on the screen.**
  - 3. Remove the recovery disc.**
  - 4. Turn off the power.**

**Note:**

This unit requires no initialization process carried out after the traditional DVD players were repaired.

When the recovery measures are taken, the customer setting will return to the factory setting as same as the procedure described in item of "Initialization" in 9.5. is carried out. Write down the contents of the setting before recovery processing, and reset the player.

### **10.2. Firmware version-up of the DVD player**

- The firmware of the DVD player may be renewed to improve the quality including operationability and playerbility to the substandard discs.processing to optimize the drive.  
The recovery disc has also firmware version-up.
- After version-up, recovery processing is executed automatically.
- Part number of the recovery disc for version-up will be noticed when it is supplied.
- Updating firmware
  1. Load the recovery disc that is supplied to the player and run it.
  2. Firmware version of the player is automatically checked.  
Appropriate message appears whenever necessary.
  3. Using remote controller's cursor key, select whether version updating is to be done or not. (Selection of Yes/No)
  4. a. If Yes is selected, version updating is performed.  
b. If No is selected, only recovery is performed.
  5. a. When updating is finished, remove the disc according to the message appearing on the screen.  
b. Remove the disc according to the message appearing on the screen.
  6. Turn off the power.

**Note:**

If the AC power supply is shut out during version-up due to a power failure, the version-up is improperly carried out.

In such a case, replace the FROM and carry out the version-up again.

## 11. ADJUSTMENT PROCEDURES

### 11.1. Service Tools and Equipment

Application	Name	Number
Tilt adjustment	DVD test disc	DVDT-S15 or DVDT-S01
	TORX screw driver (T6)	Available on sales route. (T6) or RFKZ0185
Inspection	Extension cable (module P.C.B. to mother P.C.B.)	VUC8026
	Extension cable (module P.C.B. to mother P.C.B.)	RFKZ0106
Others	Hanarl	VFK1784
	Grease	RFKXPG641
	Drysurf	RFKXGUD24
Confirmation	CD test disc	PVCD-K06 or any other commercially available disc
	VCD test disc	PVCD-K06 or any other commercially available disc
	Recovery disc	RFKZD03R005

## 11.2. Important points in adjustment

### 11.2.1. Important points in optical adjustment

- Before starting optical adjustment, be sure to take anti-static measures.
- Optical pickup tilt adjustment is needed after replacement of the following components.
  1. Optical pickup unit
  2. Spindle motor unit
  3. Optical pickup peripheral parts (such as rail)

#### Notes

Adjustment is generally unnecessary after replacing other parts of the traverse unit. However, make adjustment if there is a noticeable degradation in picture quality. Optical adjustments cannot be made inside the optical pickup. Adjustment is generally unnecessary after replacing the traverse unit.

### 11.2.2. Important points in electrical adjustment

- Follow the adjustment procedures described in this Manual.

## 11.3. Storing and Handling Test Discs

- Surface precision is vital for DVD test discs. Be sure to store and handle them carefully.
- 1. Do not place discs directly onto the workbench, etc., after use.

2. Handle discs carefully in order to maintain their flatness. Place them into their case after use and store them vertically. Store discs in a cool place where they are not exposed to direct sunlight or air from air conditioners.
3. Accurate adjustment will not be possible if the disc is warped when placed on a surface made of glass, etc. If this happens, use a new test disc to make optical adjustments.
4. If adjustment is done using a warped disc, the adjustment will be incorrect and some discs will not be playable.

#### 11.4. Optical adjustment

##### 11.4.1. Optical pickup tilt adjustment

Measurement point	Adjustment point	Mode	Disc
	Tangential adjustment screw Tilt adjustment screw	T01 (inner periphery) play T30 (central periphery) play T43 (outer periphery) play	DVDR-S15 or DVD
<b>Measuring equipment</b>		Adjustment value	
None (Main unit display for servicing is used.)		Adjust to the minimum jitter value.	

###### 11.4.1.1. Adjustment procedure

1. While pressing PAUSE and OPEN/CLOSE buttons on the main unit, press "5" on the remote control unit.
2. Confirm that "J\_xxx/yyy\_zz" is shown on the front display.

For your information:

"yyy" and "zz" shown to the right have nothing to do with the jitter value. "yyy" is the error counter, while "zz" is the focus drive value.

Note:

Jitter value appears on the front display.

3. Play test disc T30 (central periphery).
4. Adjust tangential adjustment screw so that the jitter value is minimized.
5. Play test disc T30 (central periphery).

6. Adjust tilt adjustment screw 1 so that the jitter value is minimized.
7. Play test disc T30 (central periphery).
8. Adjust tilt adjustment screw 2 so that the jitter value is minimized.
9. Repeat adjusting tilt adjustment screws 1 and 2 alternately until the jitter value is minimized.
10. Finally please reproduce T01 (inner periphery) and T43 (outer periphery) and check the jitter value. (Please readjust, when the jitter value is extremely different.)

#### 11.4.1.2. Important points

1. Make tangential adjustment first, and then make tilt adjustment.
2. Repeat adjusting two or three times to find the optimum point.
3. Finish the procedure with tilt adjustment.

#### Note:

When FFC has covered the adjustment screw, please insert a screwdriver, evading FFC(s).

#### 11.4.1.3. Check after adjustment

Play test disc or any other disc to make sure there is no picture degradation in the inner, middle and outer peripheries, and no audio skipping. After adjustment is finished, lock each adjustment screw in position using screw lock.

#### 11.4.1.4. Procedure for screw lock

Please perform a screw lock in which by the side of the tip or head of an adjustment screw.

<When a screw lock is performed to the tip part side of an adjustment screw>

1. After adjustment, remove top panel.
2. After pulling out a tray to the position which does not become obstructive, remove clamper plate.
3. Fix adjustment screw with screw lock.
4. After fixing, reassemble clamper plate and top panel.

<When a screw lock is performed to the head side of an adjustment screw>

1. After adjustment, remove top panel, front panel, rear panel and

mechanism unit in this sequence.

2. Lay the mechanism unit upside down, and fix adjustment screw with screw lock.
3. After fixing, reassemble mechanism unit, rear panel, front panel and top panel.

It is also possible to perform screw lock on the head of an adjustment screw after an adjustment end using an injector etc. from the hole at the bottom of a product (hole of bottom chassis), without decomposing.

# 15. INTERCONNECTION SCHEMATIC DIAGRAM & SCHEMATIC DIAGRAM NOTES

## 15.1. INTERCONNECTION SCHEMATIC DIAGRAM

## 15.2. SCHEMATIC DIAGRAM NOTES

This schematic diagram may be modified at any time with the development of new technology.

**Important safety notice:**

Components identified by  $\triangle$  mark have special characteristics important for safety.

Furthermore, special parts which have purpose of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

**Important safety notice:**

There are special components used in this equipment which are important for safety.

These parts are marked by  $\triangle$  in the schematic diagrams. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

**Caution!**

**IC and LSI are sensitive to static electricity.**

**Secondary trouble can be prevented by taking care during repair.**

**Cover the parts boxes made of plastics with aluminum foil.**

**Ground the soldering iron.**

**Put a conductive mat on the work table.**

**Do not touch the legs of IC or LSI with the fingers directly.**

### Notes:

#### \*Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

\*Warning: This product uses a laser diode. Refer to caution statements.

\*Capacity values are in microfarads ( $\mu$  F) unless specified otherwise, P=Pico-farads (pF), F=Farads (F).

\*Resistance values are in ohms, unless specified otherwise, 1K=1,000 (OHM), 1M=1,000k (OHM).

\*The marking (RTL) indicates the retention time is limited for this item. After the discontinuation of this assembly in production, it will no longer be available.

\*\*(IA)-(IF)", marks in Remarks indicate languages of instruction manuals. [(IA): Arabic, (IB): English, (IC): Traditional Chinese, (ID): Russian/Ukrainian, (IE): Portuguese, (IF): Spanish]

\*All parts except parts mentioned [SPC] in the Remarks column are supplied by PAVCSG.

\*Parts mentioned [SPC] are supplied by PAVC-CSG.

## 15.1. INTERCONNECTION SCHEMATIC DIAGRAM

# DIAGRAM NOTES

## 15.2. SCHEMATIC DIAGRAM NOTES

This schematic diagram may be modified at any time with the development of new technology.

### Important safety notice:

Components identified by  mark have special characteristics important for safety.

Furthermore, special parts which have purpose of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

### Important safety notice:

There are special components used in this equipment which are important for safety.

These parts are marked by  in the schematic diagrams. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire, or other hazards. Do not modify the original design without permission of manufacturer.

### Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

Cover the parts boxes made of plastics with aluminum foil.

Ground the soldering iron.

Put a conductive mat on the work table.

Do not touch the legs of IC or LSI with the fingers directly.
